

TO WHOM IT MAY CONCERN,

We would very much appreciate the opportunity to review cinematographic (video) and radiographic images of the horse that you're evaluating for the purpose of facilitating its potential purchase.

Ia. Please send the following **CINEMATOGRAPHIC (VIDEO) FOOTAGE** of the horse moving on a flat and hard (e.g. grippy asphalt or firm grass) surface:

- Walking in hand on a loose lead (straight line; 1 video).
- Trotting in hand on a loose lead (straight line; 1 video).
- Longeing (or free longeing) in both directions at a walk and trot (if feasibly safe for the horse; 2 videos).
- Upper and lower flexion testing of all four limbs (8 videos).

Ib. Please send the following **CINEMATOGRAPHIC (VIDEO) FOOTAGE** of the horse moving on a flat and soft (e.g. arena) surface:

- Longeing (or free longeing) in both directions at a walk, trot, and canter (2 videos).

II. The following **RADIOGRAPHIC STUDIES** of the horse (at minimum):

- Full studies of the thoracic (front) feet.
- Full studies of the thoracic (front) fetlocks.
- Lateral and dorsoplantar (DP) views of the pelvic (hind) fetlocks.
- Full studies of the tarsi (hocks).
- Lateral, obliqued, and caudocranial views of the stifles.
- Cervical spine (neck).
- Thoracolumbar spine (back).

I can be reached at +01 706.658.4713 if you have any questions, concerns, or if we may provide further assistance.

Thank you for your time and effort in support of our remote assessment. We're looking forward to working with you.

Sincerely,

BOB GRISEL, DVM
