

TO WHOM IT MAY CONCERN,

We would very much appreciate the opportunity to review cinematographic (video) and radiographic images of the horse that you're evaluating for the purpose of facilitating its potential purchase.

Ia. Please send the following **CINEMATOGRAPHIC (VIDEO) FOOTAGE** of the horse moving on a flat and hard (e.g. grippy asphalt or firm grass) surface:

- Walking in hand on a loose lead (straight line).
- Trotting in hand on a loose lead (straight line).
- Upper and lower flexion testing of all four limbs (if applicable/ feasible).

Ib. Please send the following **CINEMATOGRAPHIC (VIDEO) FOOTAGE** of the horse moving on a flat and soft (e.g. arena) surface:

- Longeing (or free longeing) in both directions at a walk, trot, and canter (if applicable/ feasible).

II. The following **RADIOGRAPHIC STUDIES** of the horse (at minimum):

- Dorsopalmar (DP) and lateral views of each front foot; 4 images total.
- Medial and lateral obliques views of each thoracic fetlock; 4 images total.
- Medial and lateral obliques views of each pelvic fetlock; 4 images total.
- Lateral and lateral oblique views of each tarsi (hock); 4 images total.
- Lateral and caudocranial views of each stifle; 4 images total.

I can be reached at +01 706.658.4713 if you have any questions, concerns, or if we may provide further assistance.

Thank you for your time and effort in support of our remote assessment. We're looking forward to working with you.

Sincerely,

BOB GRISEL, DVM
